INTRODUCTION

FWM (Flexible Wall Membrane) is a single coat acrylic paste designed for waterproofing wall surfaces, niches, built-in benches and similar critical details within a wetroom prior to the application of natural stone, porcelain and ceramic tiles.

Developed specifically for use in bathrooms, wetrooms and similar wet areas, FWM is quick and easy to apply, providing a consistent waterproof layer, which is guaranteed not to leak.

KEY FEATURES

- Lifetime Guarantee
- Single coat
- Odourless and solvent free
- Quick and easy to apply
- Touch dry in 30 minutes
- Ready to tile in 24 hours

- Suitable for use on all commonly encountered substrates
- 1mm Thickness when applied
- Coverage 1kg per m²
- Reinforcing tape to support junctions
- Compatible with Tilesure & Screedsure
**PRODUCT INFORMATION**

**DETAIL**

FWM is a ready to use, pale blue, solvent free paste, with superior elasticity which provides a waterproof barrier between the substrate and wall tiles.

It can be used on all commonly encountered substrates including plasterboard, timber, concrete block, cementitious render, gypsum plaster and tile backer board, with a working temperature range of +5°C to +30°C.

**FWM**

FWM is a single coat acrylic paste designed for waterproofing wall surfaces prior to the application of natural stone, porcelain and ceramic tiles. Big

**FWM Tape**

A self-adhesive HDPE butyl Reinforcing Tape with an easy peel release liner, used for reinforcing all wall and floor junctions, butt joints, niches and other detail work within the membrane. 75mm x 10m

**FWM Primer**

A quick drying acrylic primer for use prior to the application of FWM and FWM Tape. 500ml

**FWM PERFORMANCE & COMPOSITION**

**RECOMMENDED APPLICATION**

FWM should be applied to a minimum height of 2000mm on all wall surfaces within the shower area, linking onto the floor membrane with a minimum overlap of 60mm. Vertical wall junctions and other joints should be supported using FWM Reinforcing Tape.

FWM can also be used to waterproof niches, built-in benches and other similar details within the shower area, with joints supported using FWM Reinforcing Tape.

The two components of this system are the floor membrane – Tilesure/Screedsure and the wall membrane - FWM.

When installed together, they provide a complete waterproofing and decoupling solution, backed up by our Lifetime Guarantee.

See Product Specification Guide section 3.1 (Tilesure) and 3.2 (Screedsure) for full details.

Full technical data sheet available on request from our technical department.

All times refer to site conditions of 20°C. These times will be increased at lower temperatures and reduced at higher temperatures. The above performance figures are typical values and should not be considered a product specification.

TECHNICAL SUPPORT
For technical assistance please contact our experienced technical department who will be happy to assist in the following:
• Project design
• Product specification
• CAD drawings
• Method statements

TECHNICAL SEMINARS
We are able to provide CPD based seminars designed to provide guidance on key wetroom design considerations such as:
• Design and layout
• Drainage
• Waterproofing
• Flow rates
For further information please contact our technical department.

TECHNICAL ADVICE
Our team of technical advisors are able to visit you to provide a professional advisory service and assist with project design and specification.

We are also able to attend site to provide technical support and assistance.

INSTALLATION
With over 30 years experience in the waterproofing industry, our involvement in a project from conception to completion ensures that quality is never compromised.

Our services include:
• Design and installation
• 10 Year Insured Installation guarantee
• On-site training
