XTRABACKER BOARD

XtraBacker is our high-performance construction board designed specifically for use prior to the application of tiles and natural stone within bathrooms, steam rooms and similar areas.

Arundel Great Court London

DETAILS

- 171 rooms within a mixed development of luxury apartment and hotel rooms.
- XtraBacker was installed by our sister company Wetrooms UK Ltd, to full height within the wet areas and half height to the remaining walls. To comply with the site's scheduling requirements, deliveries were coordinated within a strict one-hour time slot.

TESTIMONIAL

“We chose the full supply and install service from Wetrooms UK Ltd – and it made all the difference. With product and workmanship covered by one manufacturer it ensured there was no split liability – a huge reassurance. The combination of expert installation, high-quality XtraBacker boards and a full 10-year guarantee right down to the substrate made this an easy decision. Reliable, accountable and risk-free – exactly what we needed.”

Richard Thompson
Project Manager, Ruddy Joinery

Nine Elms Parkside London

DETAILS

- 80 Luxury apartments for Telford Homes.
- 2400mm XtraBacker construction boards were installed onto a timber framework to form bath panels, providing a stable, moisture resistant substrate suitable for tiling.

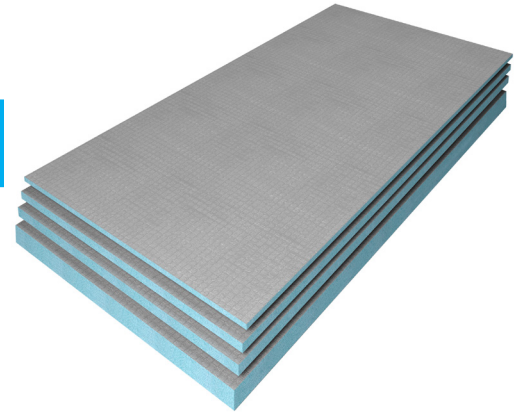

TESTIMONIAL

“We used CCL's XtraBacker construction board for the bath panels, allowing us to source everything from one supplier. All site deliveries were made on schedule, with fantastic service all round.”

Paul Bostwick
Contracts Manager Ashbury Tiles

CASE STUDY

XTRABACKER BOARD

British Standards for tiling BS 5385 Part 1:2018 states that 'tiling directly onto plywood is no longer recommended for wall tiling. Tilebacker boards are recommended as a suitable alternative.

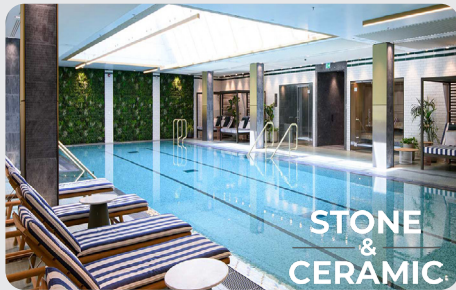

Harrow View East (Old Kodak Site)

DETAILS

- 1,611 m² of 6mm XtraBacker boards were installed to full height within wet areas, offering moisture resistance, thermal insulation and full compliance with BS 5385, backed with a Lifetime Product Guarantee.
- Next day delivery direct to site - no delays, no downtime.

Kings Road Park Leisure Suite

DETAILS

- Supplied 6137m² of 6mm XtraBacker boards for a high-spec luxury hotel and leisure suite - delivering superior moisture resistance across high-humidity, high-performance environments.
- Xtrabacker construction boards were installed, prior to the application of tiles to prevent water absorption in high-moisture areas, providing a strong, stable substrate.

Portchester Court, London

DETAILS

- 2,311 m² of 6mm and 10mm XtraBacker boards were supplied for the wetrooms within this prestigious apartment development, providing a moisture resistant substrate for tiling.
- Delivered next day with tail lift offload to overcome tight access and absence of a forklift on site - ensuring zero disruption to the project schedule.
